## DETAILED ACTION

### *Status of the claims*

1. Claims 1-7, 9-12, 44-45 and 47-52 are pending in the application, independent claims 1, 45, 48 and 50 are amended; dependent claim 10 is amended to correct a typographical error.
2. **Withdrawn objections:**
3. The objection to claim 10 for a typographical error, made of record in the previous Office action, is withdrawn in view of Applicants' amendment to the claim.

### *Reasons for Allowance*

4. Claims 1-7, 9-12, 44-45 and 47-52 are allowed.
5. The following is an examiner's statement of reasons for allowance:
6. Per Independent claims 1, 45, 48 and 50:
7. Independent claims 1, 45, 48 and 50 include limitations relating to a fluid collection apparatus comprising a housing, an open cavity configured to receive a body portion and associated body fluids, a holder configured to receive an evacuated tube, said holder and tube in fluid communication with each other through the holder comprising first and second ends and mating portions and connectors, said first and second connectors releasably coupled and sealingly engaged to mount the holder to the housing and establish fluid communications therebetween, the connectors further comprising male and female connectors, and a base mounted to the housing and said housing positioned above the holder and the holder accommodated partially within the base such that body fluids drain from the housing to the tube.

8. The closest prior art uncovered during examination discloses the following elements:

9. US Patent No. 7,118,559 issued to Toomey: teaches a fluid collection apparatus comprising a housing, holder configured to receive an evacuated tube, first and second mating portions comprising male and female connectors. Toomey does not teach a base mounted to the housing and the housing positioned over the holder and the holder accommodated partially within the base. The base mounted to the housing appears to define an improvement over the prior art as these features allow the fluid collection apparatus to be stood upright on a flat surface in use conditions such that the amount of handling or manipulation required during collection of blood is reduced which thereby reduces the exposure of a physician or nurse to needle-sticks and reduced exposure to the blood being collected during use conditions.

10. US Patent NO. 6,706,031 issued to Manera: teaches a needleless access system including a vial, syringe, elongated tubular housing providing amounting arrangement for a hub insert having a piercing element, and a stopper. Manera fails to teach or fairly suggest the housing defining an open cavity configured to receive a body portion and associated fluids, as the cavity of Manera is only capable of receiving fluids via the syringe needle; however said syringe needle is structurally incapable of receiving any body portion other than a fluid tissue such as blood and other fluids. Manera additionally fails to teach or fairly suggest a base, or a base supporting a housing, holder and evacuated tube.

11. US Patent No. 5,342,328 issued to Grossman: teaches a fluid collection apparatus having mating portions, needle, blood port, holder configured to receive an evacuated tube and the connectors establishing fluid communication between the housing and needle. Grossman fails to

teach or fairly suggest a base, connectors releasable mounting the holder to the housing and a first needless mating portion.

12. While the prior art of record discloses various elements of fluid collection components, none disclose or fairly suggest a housing defining an open cavity configured or capable of receiving a body portion and associated fluids in combination with a base mounted to a housing, and a holder, and the housing positioned above the holder and the holder partially accommodated within the base, as now specifically recited in independent claims 1, 45, 48 and 50. These features render the claimed invention nonobvious over the prior art of record. Claims 2-7, 9-12, 44; and 47, 49; and 51-52 are allowable as being dependent from independent claims 1, 48 and 50 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
